

## A Poor Weak Woman

As she is turned, will endure bravely and patiently agonies which a strong man would give way under. The fact is women are more patient than they ought to be under such troubles.

Every woman ought to know that she may obtain the most experienced medical advice free of charge and in absolute confidence and privacy by writing to the World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y. Dr. Pierce has been chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., for many years and has had a wider practical experience in the treatment of women's diseases than any other physician in this country. His medicines are world-famous for their astonishing efficacy.

The most perfect remedy ever devised for weak and delicate women is Dr. Pierce's Favorite Prescription.

IT MAKES WEAK WOMEN STRONG.

SICK WOMEN WELL.

The many and varied symptoms of woman's peculiar ailments are fully set forth in Plain English in the People's Medical Adviser (100 pages), a newly revised and up-to-date Edition of which, cloth-bound, will be mailed free on receipt of 31 one-cent stamps to pay cost of mailing only. Address as above.

## Where Post Office Money Goes.

In 1910 the total receipts of the Post Office Department were \$224,128,657.62, of which \$202,064,837.96 came from the sale of stamps, stamped envelopes, newspaper wrappers and postal cards. The sum of \$743,188.45 was derived from unpaid money orders more than a year old. This was offset in part by the expenditure of \$599,733.54 in the redemption of other money orders uncashed at the expiration of a year from the date of their issue. For this purpose an appropriation of \$1,138,223.68 had been made. It is likely that when the postal savings bank is in operation generally the amount of uncashed money orders will be materially reduced. They are now bought by many persons as a convenient means of safeguarding their money.

Of the money spent by the department more than \$56,000,000 went in salaries to postmasters, their assistants and clerks. The amount paid to railroads for transportation of the mails was \$41,000,000, but this does not include the maintenance of the railway mail service, costing \$20,000,000, the railway post office car service, costing \$1,300,000, or freight on mail bags and the like, a matter of \$157,600.

The infant rural delivery service took \$36,800,000 of the money of the Department, compared with \$31,680,000 for the city delivery. The rapid growth of the rural free delivery service of the Department, which scarcely existed ten years ago, is one of the most remarkable instances of quick development of a public utility. Expenditures under the heading of "electric and cable car service," being \$605,000, seem small when the mileage and convenience of the electric traction systems in the country are taken into consideration. The cost of the star routes was \$6,260,000. How small a part the waterways of the nation play in the distribution of its mail is shown by the insignificant sum which routes on them cost, the aggregate having been only \$635,000. The pneumatic tubes cost twice as much, while the transportation of foreign mails came to \$3,573,000.

The revenue from second class matter was \$8,175,000. If President Taft and Postmaster-General Hitchcock have their way this entry will be materially larger hereafter.—New York Sun.

# DR. PRICE'S Cream Baking Powder

Its superiority is unquestioned

Its fame world-wide

Its use a protection and a guarantee against alum food

The low-grade powders are made from "phosphate alum," or "sodium aluminum sulphate," which is also alum, a mineral acid, and that makes the food unhealthful.

One pound of the imitation (25c.) powders contains five ounces of alum, a mineral poison.

Food baked with alum baking powders is found to contain a portion of the alum unchanged.

The continued use of alum made food impairs digestion, causing dyspepsia. The careful housewife when buying baking powder, will examine the label and take only a brand whose label shows the powder to be made from cream of tartar.

## Take That Long Deferred Trip to California

Ever since your childhood you've dreamed of the seas and mountains of the Golden Coast. You've pictured it in your fancy, and year by year you've determined to cross the plains and behold its wonders.

But all of your imagination is not vast enough to paint a California as wonderful as the real. Its hills are lovelier than those of the Mediterranean; its Pacific is like no sea that you have ever beheld; its flowers are more brilliant; its skies softer—its air is sweeter than that of the Maritime Alps.
